# ONE ENG TAXI AT ARRIVAL

☐ Taxi with engine 1 is recommended in order to pressurize the blue hydraulic system to ensure brake accumulator pressure

**Note:** If taxi is performed with engine 2, the flight crew must check that the brake accumulator pressure on the BRAKES and ACCU PRESS indicator is normal.

## AT ARRIVAL

**APU..... START / CHECK AVAIL F/O**

• After high thrust operations:

**ENG MIN COOL TIME ...CONSIDER CAPT**

**Note:** The flight crew should operate the engines at or near idle thrust for a cooling period of 5 min before engine shutdown, in order to thermally stabilize the engines.

• When taxiing in a straight line:

**ENG 2 SHUTDOWN .....ORDER CAPT**

**Note:** During engine shutdown, a slight jerk forward may occur if the brakes are applied while the aircraft is moving.
